Proposed Token Distribution

1. OVERVIEW

The Company intends to make IPSX Tokens available in public on 28th Feb 2018. During the public sale, including all pre-sale events, 900 million tokens may be sold out of 1.8 billion total tokens created. The 900,000,000 IPSX Tokens made available to the public during IPSX's pre-sale and public token sale are intended to be transferable max on 5th March 2018. There is a soft cap target for the token sale of 6 000 ETH and a hard cap set at 10 800 ETH. After the conclusion of the public sale, any of the 900 million tokens not sold to token purchasers will be burned.

The basic elements for IPSX Token sale are projected bellow:

Token symbol	IPSX
Token type	ERC-20
Hard cap	10 800 ETH
Tokens for 1 ETH	70588.23529
Token sale date	28-Feb-18
Percentage of Tokens available for sale	50%
Project status	In course of integration with blockchain
Accepted currencies	ETH

2. TOKEN DISTRIBUTION

Token distribution

2A. INCENTIVES, EARLY ADOPTERS AND STRATEGIC PARTNERS

The Company anticipates using 495 million IPSX Tokens over time to incentivize strategic partners (VPN Providers, Data Centres, Data Acquisition and Custom Data Mining companies) to join and use the IPSX Network ecosystem. Also, we expect to provide incentive-based grants of IPSX Tokens to users to register their devices to the IPSX Network to encourage them to participate in and create a global ecosystems. Over time, our goal is that the network effects and broader participation created by these incentive-based grants will result in a world-wide coverage for IPSX Network

2B. BOUNTY

The Company anticipates using 45 million IPSX Tokens for bounty campaign to increase community engagement and project visibility.

2C. TEAM, EMPLOYEES AND ADVISORS

360 million IPSX Tokens are designated for the development team, founders and advisors. The IPSX tokens will be vested for 36 months, with 1/12 of tokens being released on every quarter.

3. TOKEN SALE: USE OF FUNDS

Funds received during the Token Creation will be used solely for the development and benefit of the IPSX network. The following distribution of funds is preliminary and can be a subject to change.

Core Development – 40%

Core development will involve the development of the technology

Operational – 25%

This covers the necessary costs incurred for a functional system. This includes: operations and Infrastructure costs, staffing, outsourcing, management and other related expenses.

Marketing and Sales – 25%

Marketing costs will be used for partnerships development and direct consumer marketing.

Legal and Compliance – 10%

There are legal costs associated with privacy protection and fighting censorship. The legal costs might vary from region to region.
